**Columbus, Ohio 43215**

CARB 200 Series training program provides information on processes, emission points, controls and inspection points for a variety of industrial processes. Each course includes the classroom session and field training at a representative facility, which gives the opportunity to see how the information applies to a real world situation and “real world” situation. The courses are beneficial not only for the inspector, but also for individuals involved in rule development, permitting and emission inventory development.
